Bug reporting

Field	Description
Bug ID	BUG-01
Title	Restoring an archived student permanently removes them from assigned Groups
Severity	High
Priority	High
Environment	Url: https://staging.ablespace.io/caseload/groups, Date: October 21, 2026
Browser / Device	Firefox ,Chrome on Windows 11
Reproducibility	Always
Steps to Reproduce	1. Log in to AbleSpace and navigate to the Caseload tab. 2. Navigate to the Groups sub-tab and create a group containing 2 or more students (e.g., New Group 1 containing Test Student1 and Test Student2). 3. Switch back to the Students tab, locate Test Student1, and archive them. 4. Restore Test Student1 back to active status. 5. Navigate back to the Groups tab and inspect New Group 1.
Expected Result	Restoring an archived student should restore their existing group associations, making them visible in New Group 1 again.
Actual Result	The restored student reappears in the active caseload, but is permanently removed from New Group 1. The user must manually re-add the student to the group.

Field	Description
Bug ID	BUG-02
Title	Entering leading whitespace in name fields causes profile avatar to render completely blank during real-time entry
Severity	Low
Priority	Low
Environment	Url: https://staging.ablespace.io/caseload, Date: October 21, 2026
Browser / Device	Firefox,Chrome on Windows 11
Reproducibility	Always
Steps to Reproduce	1. Log into AbleSpace and navigate to the Caseload tab. 2. Open the Add Student form or Edit Student modal for any student. 3. Enter leading space characters before valid letters in the First Name field (e.g., " Student"). 4. Enter leading space characters before valid letters in the Last Name field (e.g., " Demo1"). 5. Observe the avatar circle component in real time while typing.
Expected Result	The avatar circle should extract the student's actual initials in real time while typing, even if spaces are entered before the letters.
Actual Result	The avatar circle remains completely blank while typing if spaces are entered before the names. It only displays the correct initials after saving the form.

Field	Description
Bug ID	BUG-03
Title	Entering whitespace in required name fields suppresses frontend validation error messages
Severity	Low
Priority	Low
Environment	Url: https://staging.ablespace.io/caseload, Date: October 21, 2026
Browser / Device	Chrome , Firefox on Windows 11
Reproducibility	Always
Steps to Reproduce	1. Log into AbleSpace and navigate to the Caseload tab. 2. Open the Add Student or Edit Student modal. 3. Clear any existing text in both First Name and Last Name fields so required field error messages (First name is required) appear. 4. Type a single space character into both fields. 5. Observe the required field validation messages below the text inputs.
Expected Result	The application should recognize whitespace as empty input and keep the required field validation error messages visible.
Actual Result	Entering whitespace suppresses the required field error text on the frontend UI, even though the backend validation correctly keeps the submit button disabled.

Minor Usability Issues:

- **Usability Issue 1:** Form builder questions marked as "Required" during Daily Log form creation do not display a visible required indicator (e.g., red asterisk *) to teachers filling out the form.
- **Usability Issue 2:** The Add Guardian modal lacks a visible required indicator (asterisk *) on the Name field, despite throwing a required validation error upon submission.
