Detailed test cases

Selected Workflow: Student Management

Reason for Selection: I prioritized the Student Management workflow because it covers core operations such as student creation, validation, editing, archiving, restoration, and group membership, where data integrity directly impacts teachers' daily work.

Field	**Description**
Test Case ID	TC-01
Title	Create a student with valid details.
Preconditions	**1**.User should be Logged in and caseload tab should be open.
Test Data	Firstname: Test , Lastname: Student1 .
Steps	**1**.Click Add Student **2**.Click add Manually **3**.In first name write “Test” and in last name write “Student1” **4**.Save .
Expected Result	Student is created and appears in the active caseload with the entered name.
Actual Result	Student was created successfully and appeared in the active caseload with the entered details.
Status	Pass.

Field	Description
Test Case ID	TC-02
Title	Prevent creation when the required student name is missing.
Preconditions	**1**.User should be Logged in and caseload tab should be open. **2**.Add Student form is open.
Test Data	Firstname: (Blank) , Lastname: Student2 .
Steps	**1**.Click Add Student **2**.Click add Manually **3**.In first name keep it blank and in last name write “Student2” **4**.Attempt to save.
Expected Result	The form prevents student creation when First Name is blank.
Actual Result	The First Name field is marked as required, and the form prevents submission when it is empty.
Status	Pass.

Field	Description
Test Case ID	TC-03
Title	Search for an existing student
Preconditions	A student exists in the caseload
Test Data	Student Fullname:Test Student1
Steps	**1.** Enter the student's name in Search. **2.** Review the results**.** **3.** Clear the search.
Expected Result	The matching student appears clearing the search restores the unfiltered list.
Actual Result	The matching student appeared in the search results, and clearing the search restored the full caseload list.
Status	Pass.

Field	Description
Test Case ID	TC-04
Title	Create a guardian using only the required name
Preconditions	**1.**user should be logged in. **2.** On the caseload page search for guardian field from the student details.
Test Data	Name:Student1 Father
Steps	**1.** On the caseload page find the guardian field **2.**Click the envelope icon **3.**Click add new **4.**Enter “Student1 Father” in the name field of the form. **5.**Click save

Expected Result	The guardian is saved successfully with the entered name. The optional fields do not prevent saving.
Actual Result	The guardian is saved successfully with the entered required name.
Status	Pass.

Field	Description
Test Case ID	TC-05
Title	Validate the required guardian name when the field is empty
Preconditions	**1.**user should be logged in. **2.** On the caseload page search for guardian field from the student details. **3.**Click the envelope Icon to add the guardian and open the form.
Test Data	Name: blank ; all other fields: blank
Steps	**1.** On the caseload page find the guardian field **2.**Click the envelope icon **3.**Click add new **4.**keep the required name field blank **5.**Click save **6.**Observe the validation message and whether the form identifies the field that needs correction.
Expected Result	The guardian is not saved. A clear validation message identifies the missing name. The required status should also be communicated clearly to user. The absence of a visible required indicator is a potential usability issue.
Actual Result	The Name field has no visible required indicator. Saving with the field empty displays “Name is required!”.
Status	Pass.

Field	Description
Test Case ID	TC-06
Title	Validate missing First Name and Last Name in bulk student entry
Preconditions	**1.**User should be logged in **2**.On the caseload page click add student **3.**Click on Bulk add manually
Test Data	Bulk Add Manually table entries: • Row 1: First Name = Test3; Last Name = blank • Row 2: First Name = blank; Last Name = Student4 • Row 3: First Name = Test5; Last Name = blank • Row 4: First Name = blank; Last Name = Student6 • Row 5: First Name = Test7; Last Name = blank
Steps	**1.** Log in to AbleSpace and navigate to the student caseload. **2.** Click add student **3.** Open Bulk Add Manually. **4.** In Row 1, enter Test3 in the First Name column and leave the Last Name column blank. **5.** In Row 2, leave the First Name column blank and enter Student4 in the Last Name column. **6.** In Row 3, enter Test5 in the First Name column and leave the Last Name column blank. **7.** In Row 4, leave the First Name column blank and enter Student6 in the Last Name column. **8.** In Row 5, enter Test7 in the First Name column and leave the Last Name column blank. **9.** Leave all other fields empty in Rows 1–5. **10.** Click Save. **11.** Observe the displayed validation messages. **12.** Verify that the error messages identify the correct row and column for each missing required field.

	13. Record the actual result and verify that no incomplete student records were created.
Expected Result	The application prevents invalid entries from being saved and displays an error for each missing required field.
Actual Result	The application displayed validation errors for the missing required fields: • Oh, we found a few issues with the data! • I. Please enter data in row 1 column 2. • II. Please enter data in row 2 column 1. • III. Please enter data in row 3 column 2. • IV. Please enter data in row 4 column 1. • V. Please enter data in row 5 column 2. The validation messages correctly identified the rows and columns containing missing required fields.
Status	Pass.

Field	Description
Test Case ID	TC-07
Title	Verify that an empty row does not prevent valid students from being added
Preconditions	1. User should be logged in. 2. On the caseload page click add student. 3. Click on Bulk add manually.
Test Data	• Row 1: First Name = Test, Last Name = Student3. • Row 2: First Name = blank, Last Name = blank. • Row 3: First Name = Test, Last Name = Student5. All other fields are left blank.
Steps	1. Log in to AbleSpace and navigate to the student caseload. 2. Click add student. 3. Open Bulk Add Manually. 4. In Row 1, enter **Test** in the First Name column. 5. Enter **Student3** in the Last Name column of Row 1. 6. Leave both First Name and Last Name **blank** in Row 2. Do not enter any data in this row. 7. In Row 3, enter **Test** in the First Name column. 8. Enter **Student5** in the Last Name column of Row 3. 9. Leave all other fields empty in Rows 1-3. 10. Click Save. 11. Observe whether the application displays any validation errors for Row 2. 12. Verify whether Test Student3 and Test Student5 appear in the active caseload. 13. Check that no incomplete student record was created for Row 2. 14. Record the actual result and status based on the observed behavior.
Expected Result	The application handles the completely blank row without creating an incomplete student record. Both valid students are added

	successfully, assuming the other fields are optional.
Actual Result	The application ignored the completely empty row and did not create a student record for it. The valid student entries in the other rows were processed successfully and appeared in the active caseload.
Status	Pass.

Field	Description
Test Case ID	TC-08
Title	**1.**Verify that entering whitespace does not suppress required field validation errors
Preconditions	User is logged in and the Add Student form or Edit Student modal is open.
Test Data	Firstname: " Student ", Lastname: " Demo1" (spaces)
Steps	**1.**Log in to AbleSpace and navigate to the student caseload. **2.**Click add student. **3.**Open the Add Student or Edit Student modal. **4.**Clear any existing characters in First Name and Last Name so required field error messages appear. **5.**Enter space characters into both fields. **6.**Observe the required field validation text below the inputs.
Expected Result	The application should recognize whitespace as empty, keeping the "required field" validation error messages visible under the inputs.
Actual Result	Entering whitespace suppresses the required field error messages on the frontend, even though the form state correctly keeps the create button disabled.
Status	Fail

Field	Description
Test Case ID	TC-09
Title	Verify profile avatar initial rendering when entering space characters in name fields
Preconditions	**1.**User is logged in and the Add Student form or Edit Student modal is open.
Test Data	Firstname: " Student", Lastname: " Demo1" (spaces before letters)
Steps	1.Open the **Add Student** or **Edit Student** modal. 2. Type spaces before entering letters into the First Name field (e.g., " Student"). 3. Type spaces before entering letters into the Last Name field (e.g., " Demo1"). 4. Observe the avatar circle on screen while typing.
Expected Result	The avatar circle should display the student's initials in real time while typing, even if spaces are entered before the letters.
Actual Result	The avatar circle remains completely blank while typing if spaces are entered before the names. It only displays the correct initials after saving the form and viewing the saved student in the caseload list
Status	Fail

Field	Description
Test Case ID	TC-10
Title	Verify group membership persistence after archiving and restoring a student
Preconditions	**1.**User is logged in **2.**User is on the case load tabs in groups section **3.**A group exists containing two active students (e.g., Test Student1 and Test Student2).
Test Data	Group Name: New Group 1, Student: Test Student1,Test Student2
Steps	**1.** Navigate to the **Groups** tab and confirm both students are listed in New Group 1. **2.** Go to the **Students** tab, archive Test Student1, and verify they are removed from active caseload view. **3.** Restore Test Student1 back to active status. **4.** Re-open the **Groups** tab and check the member list for New Group 1.
Expected Result	Restoring an archived student should restore their previous group associations, making them visible in New Group 1 again.
Actual Result	The restored student reappears in the active caseload, but is permanently removed from New Group 1, requiring manual re-addition.
Status	Fail
