Exploratory Testing

S.ID	SCENERIO	WHAT I CHECKED	RESULT	NOTES
1	Dashboard Navigation	• Opened the dashboard and navigated through the available menu items to check whether the pages opened correctly.	Pass	No navigation issue observed during this check.
2	Required-field validation in bulk student entry	• Left a required field empty during bulk student entry and checked how the application indicated the validation error.	Pass	The application displayed a validation summary identifying each missing value by row and column, allowing the user to locate the incomplete entries.
3	Goal Creation and Validation	• Checked required field validation, question/answer types, and live preview.	Pass	all worked as expected.
4	Worksheet Creation & Deletion	• Created and deleted a worksheet.	Pass	Both actions worked as expected.
5	Session Log Management	• Created, edited, and deleted session logs. • Save button remained disabled until the required goal was provided.	Pass	All operations worked as expected.
6	Field Data Type Validation	• Entered data that did not match the expected field type.	Pass	Validation worked as expected.

7	Generated a report	• Generated a report and checked the output.	Pass	Report generated successfully.
8	Announcement Management	• Uploaded an announcement and checked the result.	Pass	Announcement uploaded successfully.
9	Daily Log Required-Field Indicator	• Checked whether required questions display a required indicator in the form builder.	Needs verification	Questions can be marked as required, but no required indicator is visible to the teacher creating the form.
