Cross-browser and responsive testing

Area / Feature	Chrome	Firefox	Mobile View (390 × 844)	iPad Mini	Notes
Signup and login	Pass	Pass	Pass	Pass	Authentication screens render cleanly with properly aligned input fields and submit buttons across all viewports. Page routing and post-login redirection function correctly.
Main workflow ***(Caseload list, Groups view, Refer & Earn page, Service Time tracking, and switching between Standard Table View and Compact Card View layouts)***	Pass	Pass	Fail	Fail	**1.**Fail (Mobile View): In Standard View, the blue + button in the Service Time bar is horizontally misaligned. In Card View layout, the Family Center header button drops its + icon glyph entirely. **2.**Fail (iPad Mini View): On the Refer and Get $50 screen, the primary blue buttons ("Copy Link" and "Send Email") have fixed height constraints that cut off wrapped button text vertically. **3**. Functional Note: Desktop layout renders cleanly, but functional defects in Groups and Search (*BUG-01*, *BUG-04*, *BUG-05*) are documented in Section 4.
Forms	Fail	Fail	Fail	Fail	**1.**Fail : Whitespace input suppresses required field validation error messages (*BUG-03*), and leading spaces cause avatar circles to render completely blank (*BUG-02*).

					2.Fail (Mobile View): In Compact View layout, the "Add Goal" primary button label text is off-center due to uneven CSS padding
Navigation	Pass	Pass	Pass	Pass	Page redirection and route navigation function accurately across all sections without broken links. The top header collapses into a fully functional mobile hamburger menu seamlessly on smaller viewports.
